State Representative John Schroder Launches State Government Waste Whistleblower Site

Today, State Representative John Schroder launched a website (www.StopLouisianaWaste.com) intended to allow individuals to anonymously report state government waste.

The website allows people to submit first-hand experiences of wasteful state spending.

"This upcoming special session will center around budget cuts and the lack of funding," said Schroder. "For us to know the true extent of government waste in Louisiana, we need assistance from the public. We owe it to the taxpayers of this state to spend their money wisely."

Schroder stated he "will personally view and investigate every entry."
